

PIYUSH SINGH

Frontend Developer | React.js • JavaScript (ES6+) • REST APIs | MCA Student

Dehradun, India | Open to Relocate | +91 9058227713 | piyushsingh116677@gmail.com | linkedin.com/in/[your-username] | github.com/[your-username]

PROFESSIONAL SUMMARY

Frontend-focused developer pursuing MCA (having completed BCA) at Graphic Era Hill University, Dehradun, skilled in React.js, JavaScript (ES6+), and responsive UI design. Built 3 web applications using HTML5/CSS3/JavaScript on the frontend, with REST API integration and MySQL on selected projects. Solved 200+ DSA problems and completed a graph-algorithms mentorship with a Codeforces Master. Looking for a Frontend/React Developer role to build clean, scalable, user-facing products.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), HTML5, CSS3, PHP, basics of TypeScript
- **Frontend:** React.js (Hooks, Context API), Bootstrap, Tailwind CSS, Responsive Design
- **Backend & Data:** Node.js (basics), PHP, MySQL, REST API design & integration
- **Concepts:** Component-Based Architecture, State Management, UI/UX Design, Cross-Browser Compatibility, Performance Optimization, DOM Manipulation
- **Tools:** Git, GitHub, VS Code, Postman, Chrome DevTools, Vercel/Netlify
- **AI-Assisted Development:** ChatGPT/Claude for code review, debugging, and documentation — used to cut routine development time on personal projects
- **Strengths:** Adaptable, Time Management, Persistent, Active Listening

PROJECTS

Hospital Management System | Team Lead & Developer | PHP, MySQL, JavaScript, HTML/CSS | Live Demo • GitHub

- Led a 3-member team through the full build cycle — requirements, design, development, testing, and deployment — using Trello for sprint tracking.
- Designed a normalized MySQL schema across 5 modules: patients, doctors, schedules, appointments, and billing.
- Built and integrated PHP REST API endpoints with a JavaScript frontend for real-time appointment updates.
- Reviewed teammates' database queries and API integration code, catching and fixing schema mismatches before deployment.

Solar System Weather Forecast App | Developer | JavaScript, REST API, CSS3, HTML5 | Live Demo • GitHub

- Integrated a live third-party weather API into an animated, solar-system-themed interface using vanilla JavaScript and CSS3.
- Built a fully responsive layout tested across Chrome, Firefox, and Edge, and across mobile/tablet/desktop breakpoints.
- Ran UI/UX brainstorming with a 2-person design partner to prioritize features within a 2-week build window.

VisionGuard — Real-Time Object Detection Web App | Developer | JavaScript, HTML5/CSS3, PHP | Live Demo • GitHub

- Built a web interface for uploading images/video and running them through YOLO (via API) for real-time object/weapon detection, with PHP handling file intake and the inference pipeline.
- Designed the upload/streaming UI for fast feedback and clear detection results on both image and live-stream input, optimizing for low-latency rendering and bounding-box overlay accuracy.

EDUCATION

Master of Computer Applications (MCA) — Graphic Era Hill University, Dehradun 2026 – 2028 (Expected)

Relevant Coursework: Advanced Data Structures, Advanced DBMS, Web Technologies, Software Engineering, Computer Networks

Bachelor of Computer Applications (BCA) — Graphic Era Hill University, Dehradun 2023 – 2026

CGPA: 7/10 | Relevant Coursework: Data Structures, DBMS, Web Technologies, OOP, Computer Networks

HONOURS & ACHIEVEMENTS

- **Anveshan — National Research & Innovation Competition (2024):** Represented Graphic Era Hill University after a two-stage college and zonal selection, competing against North-Zone teams at Galgotias University.
- **Graph Algorithms Mentorship — Codeforces Master (Dec 2023):** Selected for a competitive mentorship program; covered Dijkstra, Bellman-Ford, Floyd-Warshall, BFS/DFS, and MST algorithms, solving advanced shortest-path problems.
